Decorative Valves

The decorative range is both stylish and functional. They have been designed to complement the new 'feature' radiators like Myson 'Column' and 'Decor', they can also be used to complement designer towel warmers.

The decorative Range is beautifully finished in polished chrome and available as a handwheel, lockshield or thermostatically controlled valve. They not only look good, but can also save money on your heating bills! The Myson Decorative range includes the larger type suited to chunky radiators and a slimline version for modern radiators and towel warmers.
